
March Of The Living Cheat Code For Xbox 360

"Hey look! More of them boss eh eh eh." a woman walks out from behind the crackling man. "These parts are run by us now. Don't even think about running, if ya' do we'll shoot."

She turns to the other men and they ready their guns. "You got two choices, you hand over your bullets and pass through unharmed or you die right where you stand."

1. Tell them you have no ammunition.
2. Hand over all of your ammunition.
3. Fight the bandits.

Even at six dollars I feel ripped off. I did not find my only play fun at all. The gameplay, within minutes, reveals itself to be extremely repetitive, without even decent combat to fill the gaps between, pick this point, wait, pick this option, wait. Sometimes all there is on the screen is a timer showing you how much time you're wasting, literally black screen and timer. Don't be fooled by the 'inspired by FTL', FTL was fun and engaging. This is not.
